## DESCRIPTION

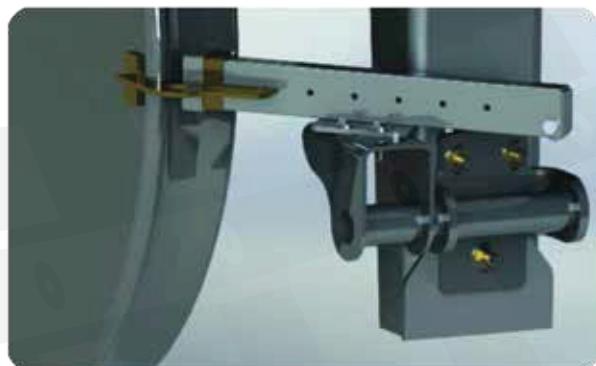

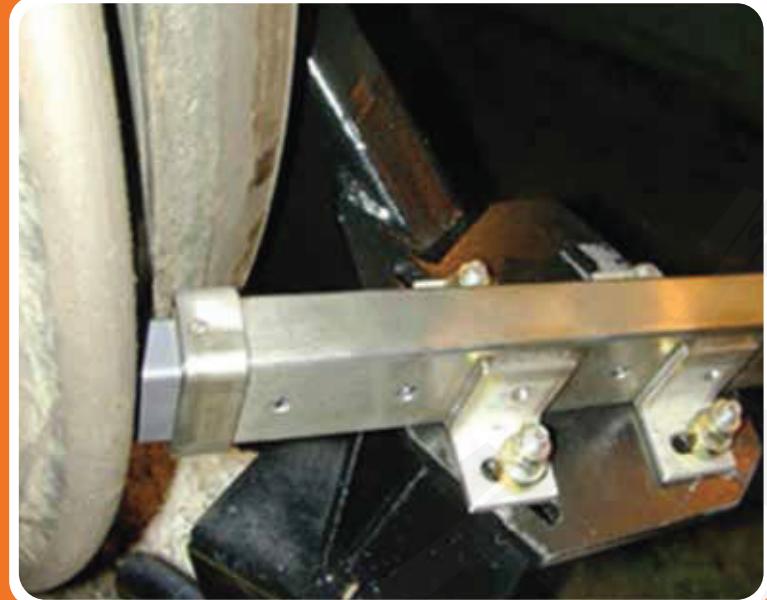

Luberr Stick or wheel flange solid lubricant is a simple and effective solution to lubricate the wheel flanges of all types of rolling stock including transit, freight vehicles & high speed trains.

It is applied continuously to the wheel flange by a bespoke solid lubricant applicator fixed to the bogie frame. Bracket & applicator assembly custom designed. 100% dry lubricant provides a thin film layer consisting of a polymer carrier and superior dry lubricant.

## FEATURES

- Dry, solid lubricant based on thermosetting polymer material capable of low and high temperature applications.
- Does not contain oil or grease based liquid Lubricants.
- Solid, non-volatile, non-flammable product.
- Compliant to EN 16028.
- Manufactured according to welding standard EN 15085:2007.
- Intelligent system having curve sensing capability.
- Various stick sizes available to match wheel profile.
- Mechanical operation - no requirement for air or electrical connection.
- OEM factory or retrofitting capability.

## BENEFITS

- Clean system - No contamination of vehicle, track or depot.
- Extends wheel flange and rail gauge life
- Minimal maintenance requirement.
- No effect on traction or braking
- Minimal environmental impact.
