STIRRER

FOLLOWER

**OCTOLUBERR** – Multi line lubrication systems are designed to provide lubricant for lube points on industrial and mobile equipment. It considerably reduces the cost of maintenance on machinery on which they are installed these OCTOLUBERR pumps. OCTOLUBERR has been designed to provide pumping solution individually without any metering devices involved to deliver the lubricant to lubrication points. The easily exchangeable pumping elements are usually operated by eccentric cam. By selecting pumping elements with different piston diameters and/or stroke, an individual lubrication volume per pump outlet is possible

### RIKKON GROUP OF COMPANIES

## Technical Specification

Operating Voltage	12 V - 24 V DC
Current	1 A - 0.05 A
No. of Outlets	32
Working Pressure	120 Bar
Reservoir Capacity	2 Kg
Max Grease capability	NLGI 1
Noise	< 70db (A)
Outlet Thread	M10 X 1P Taper Thread

## Pumping Unit Specification

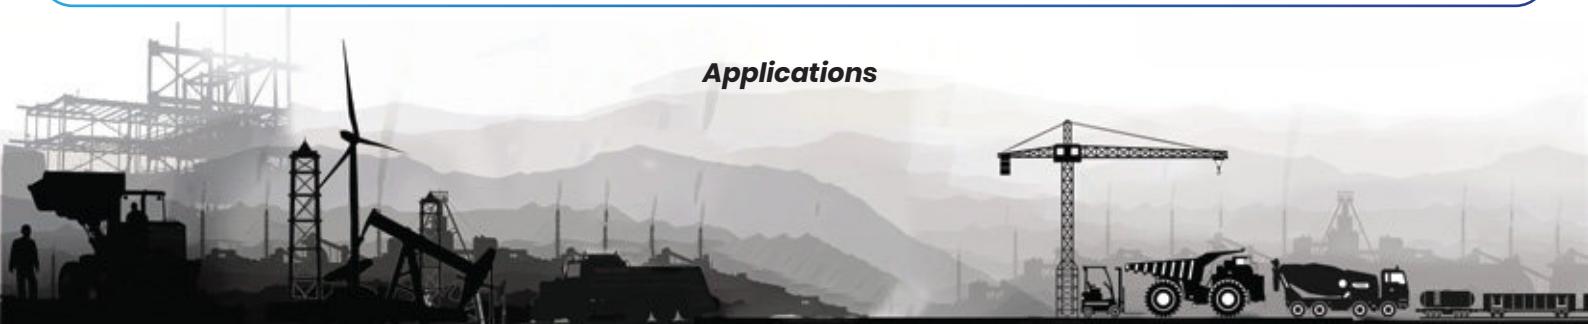

We Offer 5 Output CC Variants

1. 0.02 CC White band (**SA070**)
2. 0.05 CC Black band (**SA071**)
3. 0.08 CC Yellow band (**SA647**)
4. 0.1 CC Red band (**SA648**)
5. 0.15 CC Blue band (**SA649**)

Orders can be taken with part number in bracket
